What makes us unique!

Application Friendly

- Versatile, easy handling, and packed in kits.
- Resin rich formula is easy to trowel and will not stick to tools. Aggregate is sized to gauge application thickness.
- Can be applied vertically for base cove applications and even stairs.
- Can be installed over any clean, sound and dry surface – thus eliminating the need for removing the old flooring.

Non- Toxic and Non Polluting

- Non-toxic (and no smell during mixing and lay-down – low and no VOCs).
- Corrosive/acid/oil/abrasion/impact resistant.
- Seamless. No joints / seams for water penetration.
- Non-porous and non-absorbent -- thus it's sanitary, and easily cleaned with just a mop.
- Inherent anti-microbial properties.
- Slip resistant - even when wet.

What makes us unique!

Excellent Physical Properties

- Excellent low temperature properties in cold temperature environments.
- Unlimited life expectancy with proper maintenance.
- Tremendous bonding strength to a variety of substrates such as wood, metal, concrete, quarry and ceramic tile and on any kind of solid surface

Cost Effective

- Quick one-step installation - saves time and money.
- Installs in less than one day vs. other types of flooring which take 3 - 4 days.
- Tough wearing surface requires no periodic resealing.
- Can be applied over existing flooring thus eliminating the cost of removing the old floor.
- Lightweight, troweled.

At ASTRA, we believe in giving 110%. By using our next-generation Technology, we help organizations to provide effective & efficient flooring solution.

We thrive because of our market knowledge and great team behind our product.
